

JUNIOR SCHOOL HEALTH & SAFETY POLICY

This document is to be read in conjunction with the whole College Health and Safety policy.

Rationale

This document is designed to supplement the College's Health and Safety Policy. As part of the College the Junior School falls under the umbrella of the College's Health and Safety policy, but due to the age of the pupils and the location of the Junior School building there are issues which need addressing specifically.

Matters relating to Health and Safety will be linked closely with other policies and should be read in conjunction with those policies i.e. the whole College Safeguarding policy, the First Aid policy, Fire Procedures, Educational visits policy and the Junior School Behaviour policy and Anti-Bullying Policy, and Supervision of Pupils policy

General

- Children should be able to experience a wide range of activities. Health and safety measures should help them to do this safely, not stop them.
- It is important that children learn to understand and manage the risks that are a normal part of life.
- Common sense should be used in assessing and managing the risks of any activity. Health and safety procedures should always be proportionate to the risks of an activity.
- Staff should be given the training they need so they can keep themselves and children safe and manage risks effectively.

The law requires employees to:

- take reasonable care of their own health and safety and that of others who may be affected by what they do at work
- co-operate with their employers on health and safety matters
- do their work in accordance with training and instructions
- inform the employer of any work situation representing a serious and immediate danger, so that remedial action can be taken.

In addition, teachers and other staff in schools have a common law duty to act as any prudent parent would do when in charge of pupils.

Junior School Health and Safety Officer

The Junior School has a Health and Safety (H&S) officer who sits on the College's H&S committee. They complete a visual check of the Junior School weekly and report any issues to the relevant departments for action. Any members of staff who discover an issue relating to health and safety may report the matter directly for attention, but should also inform the H & S officer of the matter so a record can be kept.

Pupil Supervision (to be read in conjunction with the Junior School Supervision of Pupils Policy)

Pupils should be supervised by an adult for the majority of the time they are in school. Whilst in lessons the teacher should ensure that pupils can carry out the activities in a safe manner and where necessary have been shown appropriate methods of working to ensure their safety. This may be particularly relevant in the more practical subjects such as Art, DT and Science. Where it is deemed necessary a second adult may be used to support the teacher in lessons to aid in the supervision of the pupils.

Junior School pupils are able to move around the main College site unsupervised in order to get to lessons being held beyond the Junior School building. However no Junior School boy is to leave the main site unsupervised. For lessons taking place in the PE Centre and its facilities pupils will be supervised in crossing College Road at one of the two zebra crossings.

Pupil supervision starts 25 minutes before morning school starts when a member of staff will be in the playground from 8am. At the end of the day a member of staff will be responsible for ensuring that pupils have been collected and if any remain after 15 minutes they will be brought back into the school whilst contact is made with their parents and collection is arranged. During break times the pupils should be supervised by three members of staff. These will be spread out around the areas used by the pupils.

At the end of the school day, or following after school clubs and practices, Junior School pupils should be met by an adult or older sibling, usually from the Junior School, and escorted home by them. The exceptions to this are boys who use the College coach service, those who cycle home, and those who walk home. Parents have to notify the Junior School if they wish their sons to make their own way home. A member of staff (in all but exceptional circumstance a member of SMT) will be on site until the last child is picked up from After School care.

Trips, Visits and Fixtures (to be read in conjunction with the College Educational Visits policy)

Junior school boys are taken on a number of educational visits to support the curriculum each year.

Before any visit can be undertaken a preview of the location should be undertaken by a member of staff and a risk assessment written. This should be submitted to the Deputy Master Co-Curricular for approval and a copy passed to the Junior School H&S officer for record keeping. All parents will be notified of the visit and permission received to take the boys out of school. At least one member of staff must carry a mobile phone with them and be contactable by the school if necessary.

A first aid kit should be carried with the party and any medication needed by the boys should be taken with the party.

Sufficient adults should accompany the visits in order to maintain a safe ratio. This may vary according to the level of activity but in general a ratio of 1:10 should be sufficient for visits to museums etc.

Parents are encouraged to support the programme of visits. Before they accompany the boys, they have to undergo a 'List 99' check and they are not permitted to take a group on their own.

Each year the pupils in Years 4 and 5 travel to the College's Outdoor Centre in the Brecon Beacons for a residential trip. Year 6 will also spend time away on an activity week. Prior to any of these residential visits, the parents will be notified of the arrangements for the trip and will have the opportunity to attend a parents' evening where details and expectations can be explained. As with day visits, previews and risk assessments will need to be carried out by one of the trip leaders and written permission has to be obtained from parents (this may be done through the Dulwich Post electronic response system). During these trips the staffs are acting in 'loco parentis' and should manage the supervision of the boys as any responsible parent would do. Staff ratios for activities may vary according to the activity but will not exceed 1:10 and may be as low as 1:5. Activities are led by qualified instructors with school staff ensuring that pupils' welfare is a priority.

Sports fixtures

Many sports fixtures are undertaken during the school year. Prior to a fixture parents will be notified of the fixture and appropriate details given. For home fixtures taking place in school time permission is not needed, but for all away fixtures permission should be sought. This is usually done through the Dulwich Post electronic response system. Travel to 'away' fixtures is usually by coach or school minibus.

Transporting Pupils

Travel for trips, visits and fixtures are normally undertaken on a coach or school minibus.

Staff accompanying pupils on coaches should carry out a count as they board to ensure numbers are correct. All passengers should wear seat belts and staff should check that pupils have fastened their belts and that they are adjusted properly. Pupils are expected to behave sensibly and not to act in a manner that may cause a danger to themselves or others, whether directly or through distraction.

Junior School staff may drive the College's minibuses provided they are on the College list of approved drivers. As with coach travel, all passengers should wear a seat belt and staff should check they are fastened correctly. For short journeys it may be that just one adult is sufficient on the minibus but for longer journeys there should be two.

Medical and First Aid (to be read in conjunction with the College's First Aid Policy)

To ensure the safety of the pupils, parents are asked to complete a medical information sheet prior to their son starting at the College. The College's Medical Centre retains this information and disseminates it as

appropriate. The Junior School Office and common room contain important information relating to boys with medical conditions that need monitoring e.g. if a boy has asthma or has particular allergies.

If a boy needs medication during the day it should be taken to the Medical Centre for safe-keeping and administration. The exceptions to this are:

- **Asthma Inhalers:** These may, with parental permission, be kept by the boy for use as necessary. When boys are participating in sports activities and fixtures these should be handed into the member of staff taking the activity for safe-keeping and given to the boy for use if necessary.
- **Epipens:** Boys requiring an epipen should have it available at all times, with a spare being kept in the Medical Centre. All staff are given regular training in the use of epipens and asthma inhalers. This training will normally be carried out by the Medical Centre staff. It is also advisable that staff seek a refresher course or update from the Medical Centre staff prior to any residential trip.

Illness and injury

If a boy feels unwell during the school day, the staff member should send him to the Junior School office in the first instance. The Junior School secretary and the receptionist are both qualified First Aiders. If they feel it appropriate, then they will send the boy to the Medical Centre. In all but very minor cases a boy will be accompanied by either another pupil or by a member of staff. The Junior School secretary will provide the boy with a slip (which has a duplicate) to acknowledge that we are aware the boy has gone to the Medical Centre.

Minor playground bumps and scrapes can be dealt with by the Junior School staff. However, boys who have sustained any injury that may need medical treatment and any blow or bump to the head, however minor it may seem, will be sent to the Medical Centre via the Junior School office.

When accidents occur the Medical Centre staff complete an accident form and an electronic copy is sent to the Junior School secretary who stores it on the boy's individual file. The medical centre will contact the parents.
